HEART DISEASE

Facts Regarding the Rapid In-crease of Heart Trouble.

Heart troubles, at least among the Americans, are certainly increasing, and while this may be largely due to the excitement and worry of American business life, it is more often the result of weak stomachs, of poor digestion.

Real organic diseare is incurable, but not one case in a hundred of heart trouble is organic.

The close relation between heart trouble and poor digestion is because both organs are controlled by the same great nerves, the Sympathetic and Pneumogastric.

In another way, also, the heart is affected by the form of poor digestion, which causes gas and fermentation from half-digested food. There is a feeling of oppression and heaviness in the chest, caused by pressure of the distended stomach on the heart and lunga, interfering with their action, hence arises palpitution and short breath.

Poor digestion also poisons the blood, making it thin and watery, which irritates and weakens the heart.

The most sensible treatment for heart trouble is to improve the digestion and to insure the prompt assimilation of food.

This can be done by the regular use after meals of some safe, pleasant and effective digestive preparation, like Stuart's Dispepsia Tablets, which may be found at most drug stores, and which contain valuable, harmless direstive elements in a pleasant, convenient form.

It is safe to say that the regular persist.

convenient form.
It is safe to say that the regular, persistent use of Stuart's Dyspens'a Tablets at meal time will cure any form of stomach trouble except cancer of the stomach.
Full-sized packing of these tablets sold by druggists at 50 cents. Little book on stomdruggists at 50 cents. Little book on stom-ech troubles malled free, Address F. A. Stuart Co., Marshall, Mich.

REPLACES WEAKNESS WITH STRENGTH.

By Method of Applying Electricity for the Radical Cure of Nervo-Vital and Kindred Aliments Has Proven the Greatest Boon Ever Of-fered Mankind—Read My Free Books on Nervous Disorders and Electricity.

A Vigorous, Strong Man is looked up to -people are proud to know him. All that keeps him strong bodity and mentally is this great Nerve Force, which is, in real-

ity, the abundance of Electricity in his system. If from any cause you are Weak, or Nervous, or if you are suffering from any form of Nervo-Vital Disorders, there is a lack of Nerve-Force or Electricity in your system, and before you can hope to become Strong and Vigorous again Electricity will have to be infused into your system.

After many years of patient study and work I have discovered a means of Supplying Electricity to Weak Systems which will not fall to cure. My Electrical Appliances are used in every known part of the world, and I am dally in recept of letters from now cured and happy patients praising them. I call my Electrical Appliance an "Electric Belt," because that is really the proper name for it, as the Appliance is worn around the body as a belt; but do not confuse my discovery with the many contrivances, so-called electric belts, which are now being offered the public in great variety on the reputation of my Belt. I owe my success entirely to the sterling worth of my Appliances.

My Electrical Appliances have soft, silken, chamols-covered sponge electrodes which do away with that frightful burning and wilstering caused by all other electric belts if they give a current. Mine has interphangeable battery cells and can be renewed when burned out for only 75c; when others burn out they are worthless.

FRENCH ACTORS INCENSED.

Regard Comedie Francaise Innova tion as a Sacrilege. SPECIAL BY CABLE.

SPECIAL BY CABLE.
London, Oct. 19.—The dismissal of the Comedic Francaise Reading Committee, and the giving of the selection of plays to M. Jules Claretic. is regarded as almost a sacrilege by some, the committee having been created by Napoleon I.

The Matin gives a cartoon showing the committee at a table rapping to consult the shade of Napoleon, M. Coquelin reads out the knocks. It is not Napoleon, but Cambronne, who answers in the historic words he uttered at Waterloo, which was expanded into "The guards die, but never surrender." Mme. Bernhardt advises the committee to resign, but adds that they could not earn sheir salt elsewhere.

Via Illinois Central R. R., October 19, 20, 21, and returning October 23. New City Ticket Office, No. 308 North Broadway.

ROOT RETURNS FROM OUTING. Secretary of War Will Resume Du-

ties in Few Days. Utica, N. Y., Oct. 19.—Secretary of War Root left Little Farned Lake, on William C. Whitney's preserve, in the Adirondacks, this morning and will reach here this evening. He will see not see that evening the will spend Sunday with his son, where he will spend Sunday with his son, a student at Hamilton College, and with his brother, Professor Oren Root.

Secretary Root is reported to be in excellent health. He will proceed to Washington the first of next week.

DUKE OF MARLBORO MAY BE VICEROY OF IRELAND.

Retirement of Lord Cadogan Again Predicted, as Is the Prophecy That the Husband of an American Woman Will Succeed Him.

SPECIAL BY CABLE.

London, Oct. 19 .- There have been so many stories about Lord Cadogan's retirement from the viceroyalty of Ireland, and so many denials, that it may seem no news to say he is not retiring.

It may be taken for granted, however, that his Excellency will do so when the King and Queen visit Ireland. That being so, rumor is rife as to his (

successor. It is quite a long time since it was first stated that the Duke of Marlboro might be the next Viceroy. The Republic mentioned some of the rea

sons spoken of in society circles why influence might be brought to bear upon the King against the Duke of Marlboro getting the post of honor, but the King's followers know very well by this time he is not the man to be influenced by anybody or any number of anybodies who are actuated by nothing more than jealousy of seeing an American lady occupy such an exalted posi-

The Whitehall Review, whose society correspondent seems to me to be one of the very best informed, so far as royalty is concerned, in London, says it has good reason for believing its first prophecy that the loccupied.

Duke and Duchess of Mariboro will be the next occupants of Dublin Castle To be correct, Lord and Lady Dudley are life, and as the Countess is very quiet and

retiring, there seems little likelihood of

their accepting the post even if it were

offered.

It has always been a grief to the Duke of Mariboro that Mariboro House passed beyond the reach of Blenheim, and it is said by some that it is owing to the hope of the Duke and Duchess that they may be in a position to buy back Mariboro House from the State, that the operations at the site of their new house have been so long discontinued.

long discontinued.

Not only is the Duke of Marlboro full of ambition to acquire the home of his an-cestors, but ever since the Duchess arrived in England she has had all the characteristic anxiety of American life for the beautiful home of the illustrious ancestor of the Mariboros.

Now that all the late Queen's relations have been provided with London palaces there are some who think it is quite feasible for the King to see this way to gratify the desire of their Graces of Marlboro and part with the town residence he has so long

RENOUNCES ROYAL RIGHTS TO BECOME PRINCE'S BRIDE.

ARCHDUCHESS ELIZABETH OF AUSTRIA.

Vienna, Oct. 18.—The announcement of the engagement of the Archduchess Elizabeth of Austria to Prince Otto of Wendischgraetz has come as a complete surplirse to society in general and is of the most farreaching consequences.

The young Archduchess must renounce her rights as a sovereign of the house of Hapsburg in order to marry Prince Otto. The Emperor's nephew will likely succeed to the throne when the reins of power are

dropped from the aged Franz Josef's hands.
Austria-Hungary has many peoples in its domains, but they have always been united in their love for the little Elizabeth, now but 18 years of age, the child of Crown Prince Rudolph, whose life ended tragically at Meyerling, and the Princes Stephanle, now Countess Lonyay. Whether the nation will be united after the Emperor's death and the end of the direct line remains a matter for speculation.

GOVERNMENT WILL NOT BE REPRESENTED

Refuses Officially to Witness the Execution of Czolgosz, Who Murdered the President.

REPUBLIC SPECIAL.

Albany, N. Y., Oct. 19.-The United States Government has refused officially to witness the execution of Czolgosz, assassin of President McKinley. Secretary of State Hay made this known to State Superintendent of Prisons C. V. Collins to-day. The following letter was received by Superintendent Col-

To Cornelius V. Collins, Esq., Superintendent of State Prisons, Albany, N. Y.; My Dear Sir-I have received your letter of October 10, and, while thanking you for your courtesy, it is not considered expedient to have a representative of Government present on the occasion you refer Yours respectfully. JOHN HAY. The letter is on governmental mourning stationery of purple and black.

FRENCH PRETENDER A WRITER.

Duc d'Orleans Tells of the Joys of a Sailor's Life.

a Sailor's Life.

SPECIAL BY CABLE.
Paris, Oct. 19.—Parisian journalism counts another august recruit, no less a person than the pretender to the French throne.
The Figaro has just published an article by the Duc d'Orleans, recounting the joys of a sailor's life.
The Archduke Salvator recently contributed a beautiful essay entitled "Voice of the Wave," which serves as the Pretender's text.

EDWARD TO GIVE GARDEN PARTIES.

British Ruler to Revive an Ancient Custom That the Queen Had

Abandoned.

SPECIAL BY CABLE. London, Oct. 19 .- The King, I hear, intends to revive the practice of giving large garden parties at Buckingham Palace, which had been practically dropped for years by the late Queen, except on a few ceremonial occasions, like the Diamond Jubilee. The Duke and Duchess of Connaught also intend to give garden parties.

The gardens of St. James Palace, which have always been at the disposal of the occupants of Clarence House, will now again be used for this purpose by the Duke, and the point of a Buckingham Palace garden party is that it enables the King and Queen to entertain on a larger scale and with greater scope than is possible at state balls

Actor Slashed by Actress.

SPECIAL BY CABLE. Paris, Oct. 13.—A beautiful actrers, Mile, de Milo, jealous of a comedian, Georges Coquet, appearing in a successful play now running at the Folies Dramatiques, quarreied with him and slashed him over the face with a razor. M. Coquet's life is in

American Wedding in Paris SPECIAL BY CABLE. Paris, Oct. 19.—It is announced in the American colony that the wedding of M. Harry A. Van Bergen, and Miss Ethel Irvin will take place on November 12.

DUCHESS OF NEWCASTLE NOT COMING TO AMERICA. TALL POLES NOT NECESSARY.

She Is Too Fond of the Hunt to Get Far Away From Clumber and Earth Is Used as a Conductor of Too Much in Love With Her Flowers to Leave Them.

SPECIAL BY CABLE. London, Oct. 19 .- There is no truth whatever, I am able to say, in the report that the Duchess of Newcastle is going to America, as so many papers have stated. She is far too fond of hunting to be long away from Clumber at this time of the year. There she means to stay during the winter, with the exception of a short trip to London. I do not think it is generally known how

favor in England. It was while staying with Lord Charles Conyngham at Mount Charles, in Ireland, some years ago, that he noticed these beautiful flowers. He was presented with half a dozen plants by his host and took them back to England and gave them to Lord Londesborough, who very quickly made them popular. Now Lord Rothschild and Mr. Leopold Rothschild are both famous for their culture

I do not think it is generally known how fond the Duchess is of flowers. The taste is undoubtedly inherited from her father. Major Candy, who was passionately devoted to floriculture. It was he who first introduced the smilex into England.

Another thing which I think is not much known is that it was Major Candy who first introduced the smilex into England.

Another thing which I think is not much known is that it was Major Candy who first introduced the smilex into England.

rought the Malmaison carnations into

progress for the last year, the result of which is that ency submitted a demonstra-

lon yesterday.

Briefly, the new system, besides transmitting ordinary dot and dash messages, will carry sound like a telephone, and will carry energy sufficient to steer a torpedo, all the time under control of the operator.

or transmit messages, Interesting Experiments Made.

Sound as Well as Dots and Dashes—Torpedo Boat Steered by It.

Steered by It.

Steered by It.

Special By Cable.

London, Oct. 19.—A formidable rival to the Marconi system promises to invade the field of wireless telegraphy.

This is the Armori system for the electrical transmission of energy, by which effects similar to Marconi's system, with several additions, can be transmitted without the sid of wires.

Mr. Ariel Orling, a young Swede, is the discoverer of this novel development of electrical science, and associated with him is Mr. J. T. Armstrong. an English electrican, at whose country resignates have been in Buckinghampshire experiments have been in Consulted his paper, while at the same mo-

ment there was a buzzing sound of the ma-chinery of the little vessel and the next instant the rudder of the torpedo swung hard aport. Another whistle, and the rud-der straightened out backward and for-ward. At every angle in steering, the little brass rudder swerved and turned, every motion being checked off by the man by the lakeside as correct with a prearrange-ment made with his associate before the experiment began.

peated.

This system differs from the Marconi system inasmuch as it requires no coherer or overhead poles, while its installation, when perfect, should be simplicity Itself. It is certainly the most wonderful electrical discovery of this new century.

Remarkable Results Claimed for an Invention by a Young Swede.

Sound as Well as Dots and

all the time under control of the operator, besides doing away with the necessity for the tail poles used in the Marconi system.

The whole mechanism at each end is hardly more bulky than an ordinary telegraph instrument, while the only installation required consists of sticking the two ends of the ground wires into the earth, whereupon the apparatus is ready to receive the transfer messages.

At the corner of a five-acre field, a quaint structure like a primitive railway signal box, showed where the wireless messages were transmitted. The first experiment was receiving the Morse code signals. In a shed below a signal box an arrangement was at-tached to the walls—an instrument which looked like a combination of telephone and

ment made with his associate before the experiment began.

An Expert's Description.

It was a wierd scene—a dozen men under dripping umbrellas bending down to watch the gyrations of a miniature torpedo, whose rudder moved this way or that, apparently of its own motion. A toy steamer sudenly endowed with life would hardly be more uncanny. There was not a vestige of wire.

more uncanny. There was not a vestige of wire.

An expert electrician who examined such portions of the apparatus as the inventors would allow thus explains the invention:

"The advantage of this over other wireless systems arises from the fact that the earth is used directly as a transmitting medium and no natural obstruction interferes with the transmission of the impulses. Stripped of technical terms, the system may be thus described:

"At the transmitting station are two earth terminals. The transmitting instrument, connecting with an ordinary eight-voit battery, causes electric action between these terminals, consisting of a high potential lacharge and low-tension current. By this means a number of impulses are set up whose radius of action extends over a certain area.

"Within this area is interposed a receiving."

whose radius of action extends over a certain area.

"Within this area is interposed a receiving instrument which, by a similar but reversed action, will reconvert the transmitting impulses into mechanical action. For instance, the action of the Morse instrument in dots and dashes is thus conveyed in the earth, transmitted in the shape of impulses to the receiving instrument, where the mechanical dots and dashes are repeated.

WALL STREET RUINED HIM.

Brother of William Watson, English Poet, Commits Suicide.

REPUBLIC SPECIAL. REPUBLIC SPECIAL.

New York, Oct. 19.—Ruined in Wall street,
James Watson, a speculator, killed himself a
by inhaling gas in the Morton House, at a
Fourteenth street and Broadway, to-day.

Watson was a man of refinement and education, a brother of William Watson, the
English poet, and within a year he was
possessor of a large fortune. It is believed
that this was dissipated in puts and calls
in Wall street.
